ASSIGNMENT 1

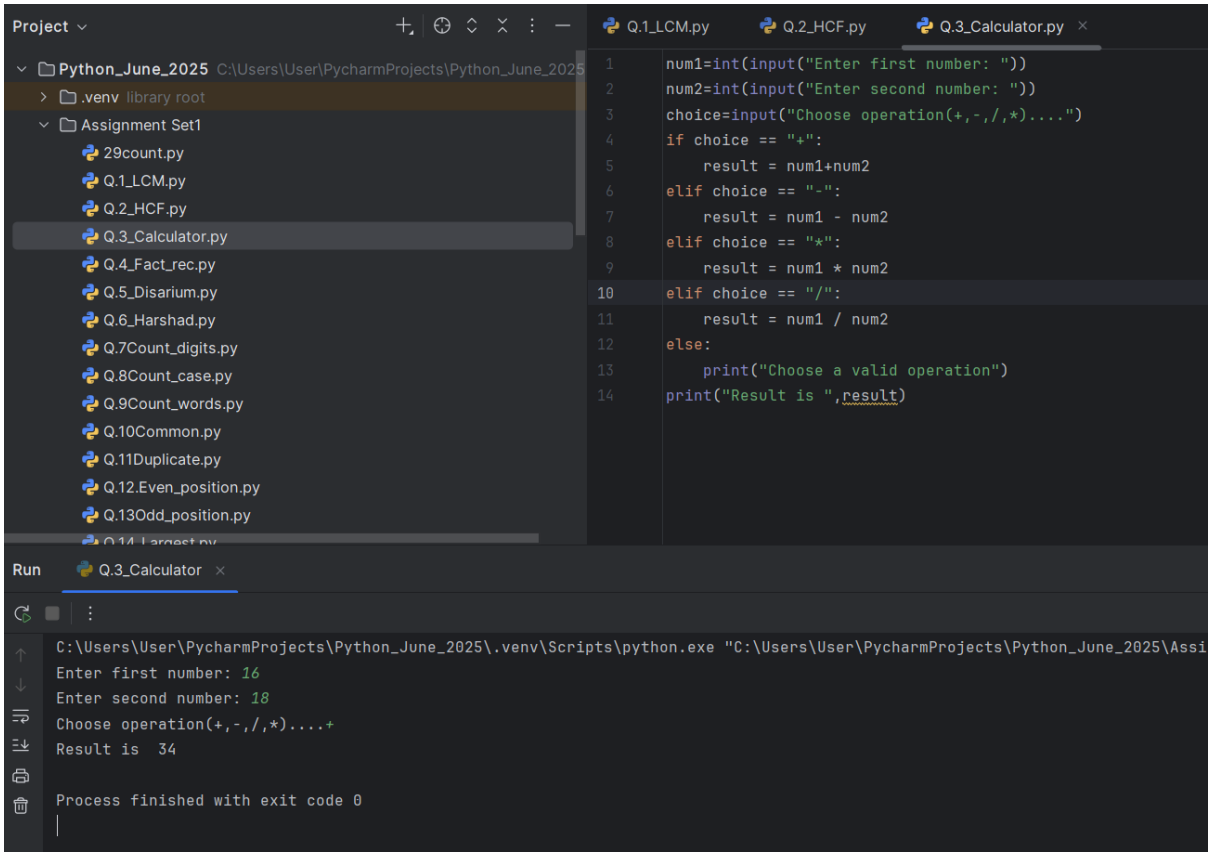

1. Python Program to Find LCM

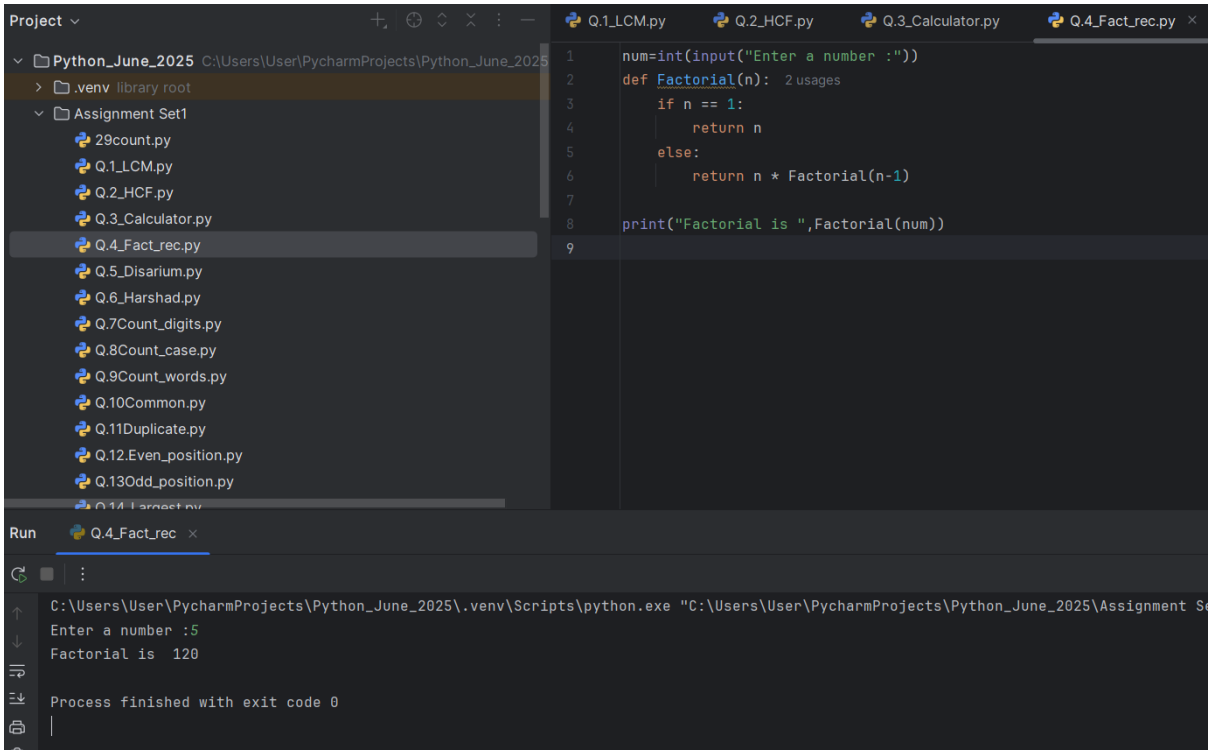

2. Python Program to Find HCF

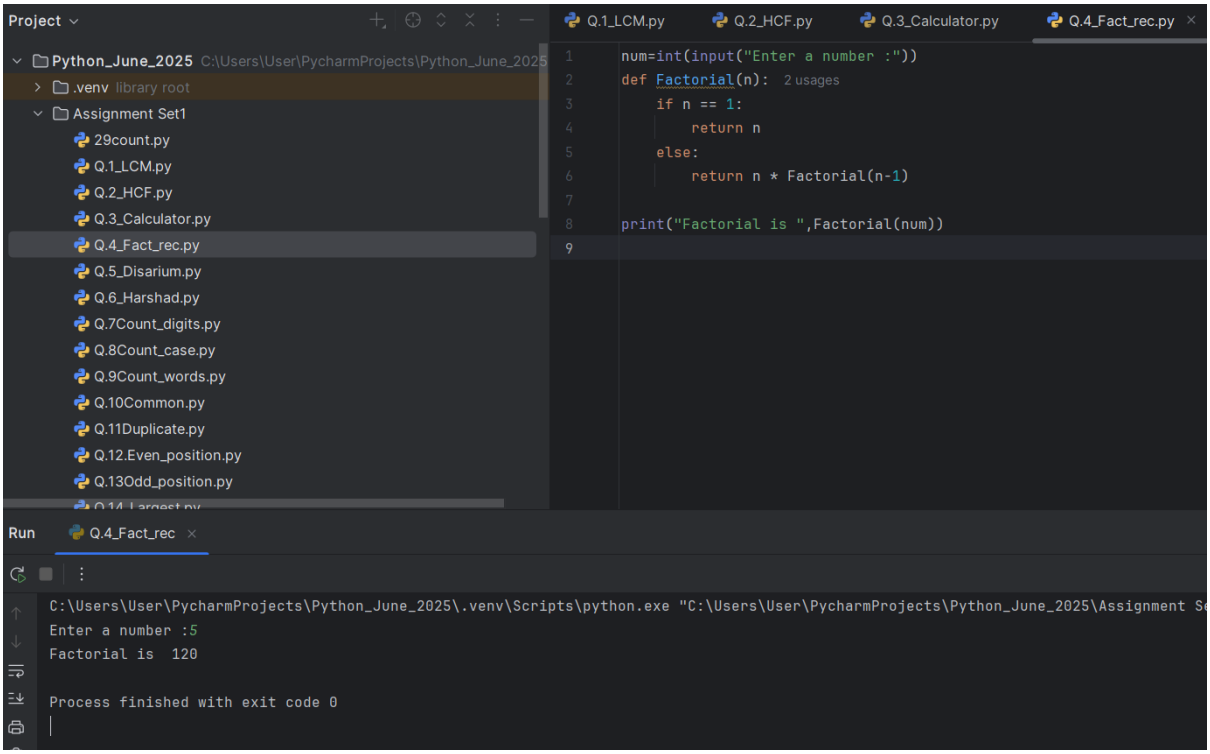

3. Python Program to Make a Simple Calculator

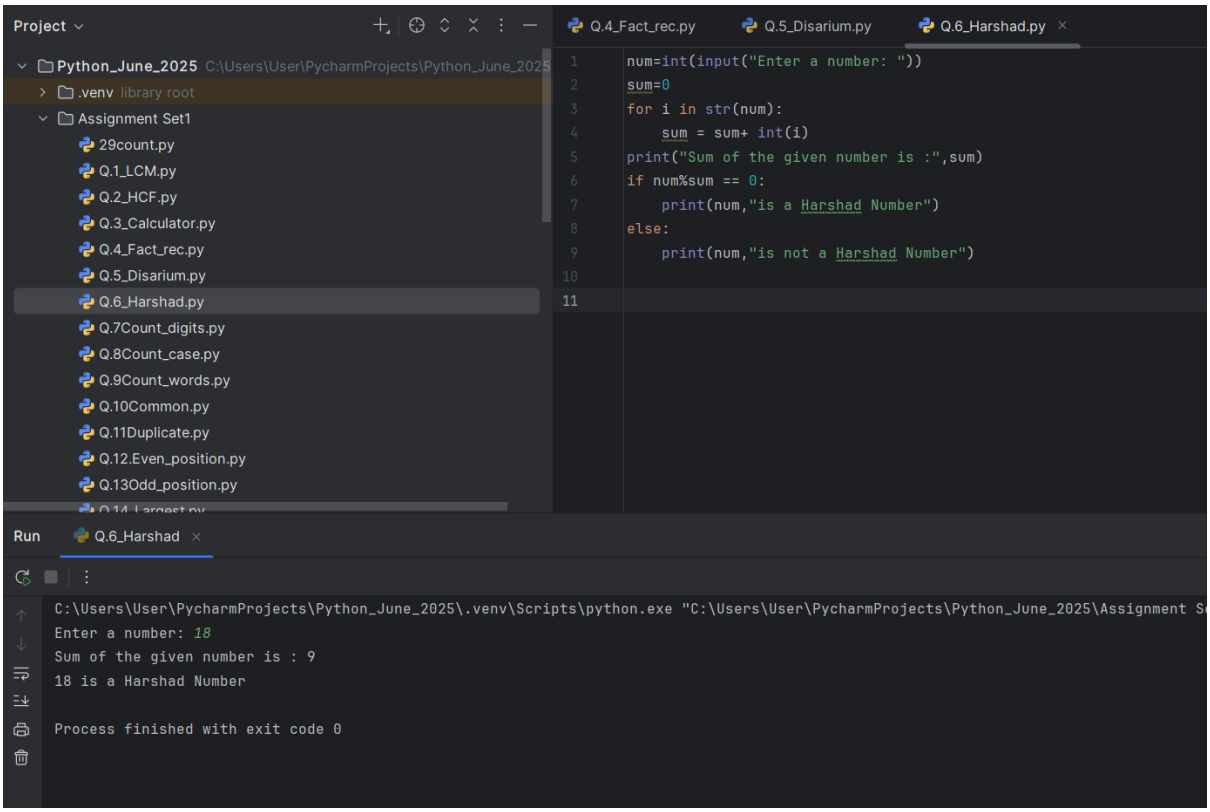

4. Python Program to Find Factorial of Number Using Recursion

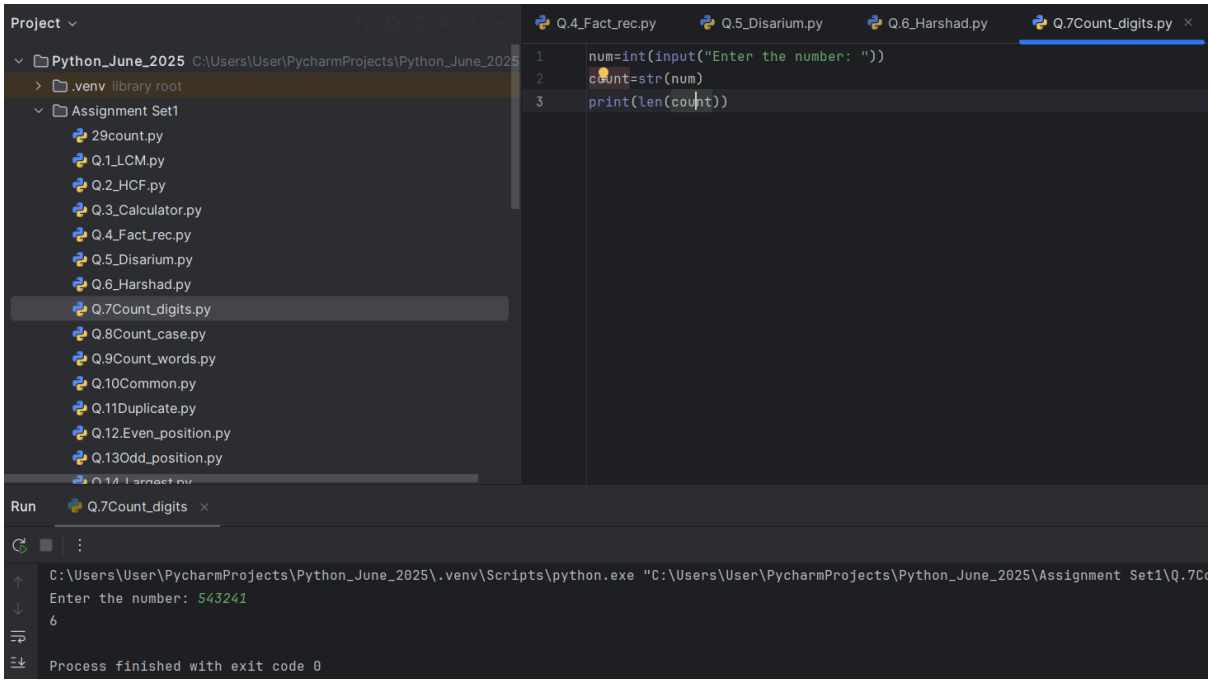

5. Python program to check if the given number is a Disarium Number

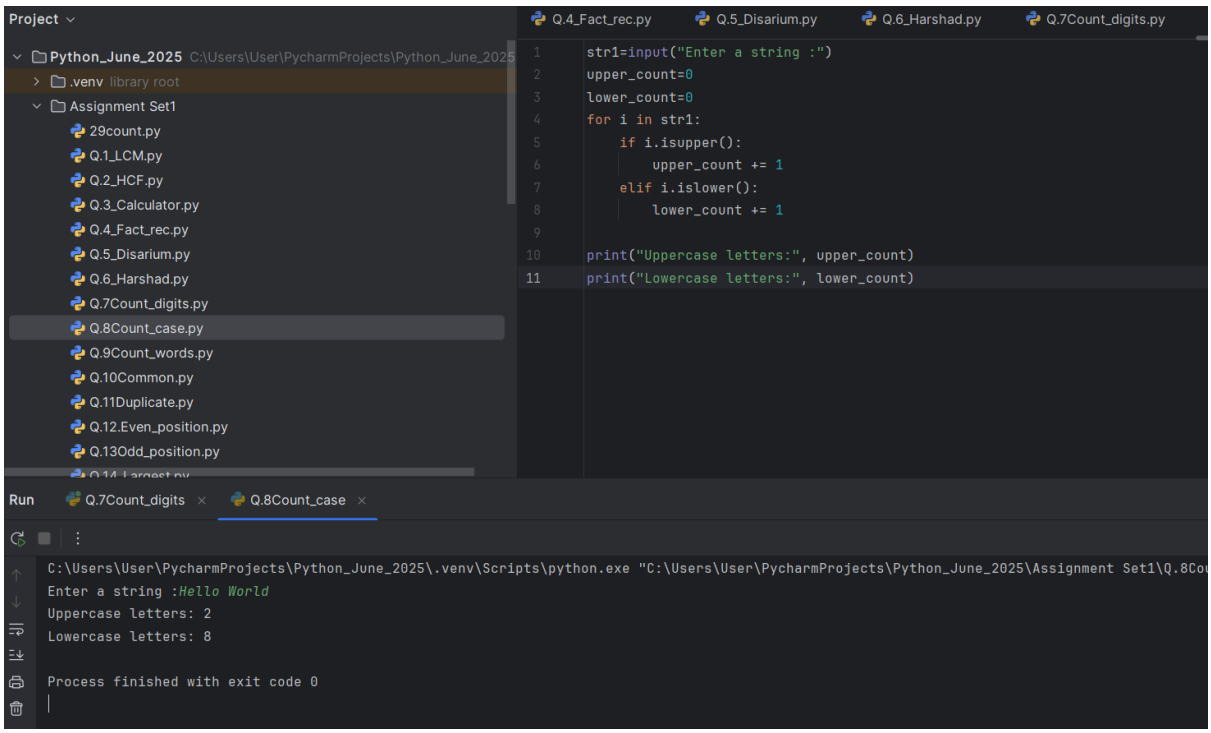

6. Python program to determine whether the given number is a Harshad Number

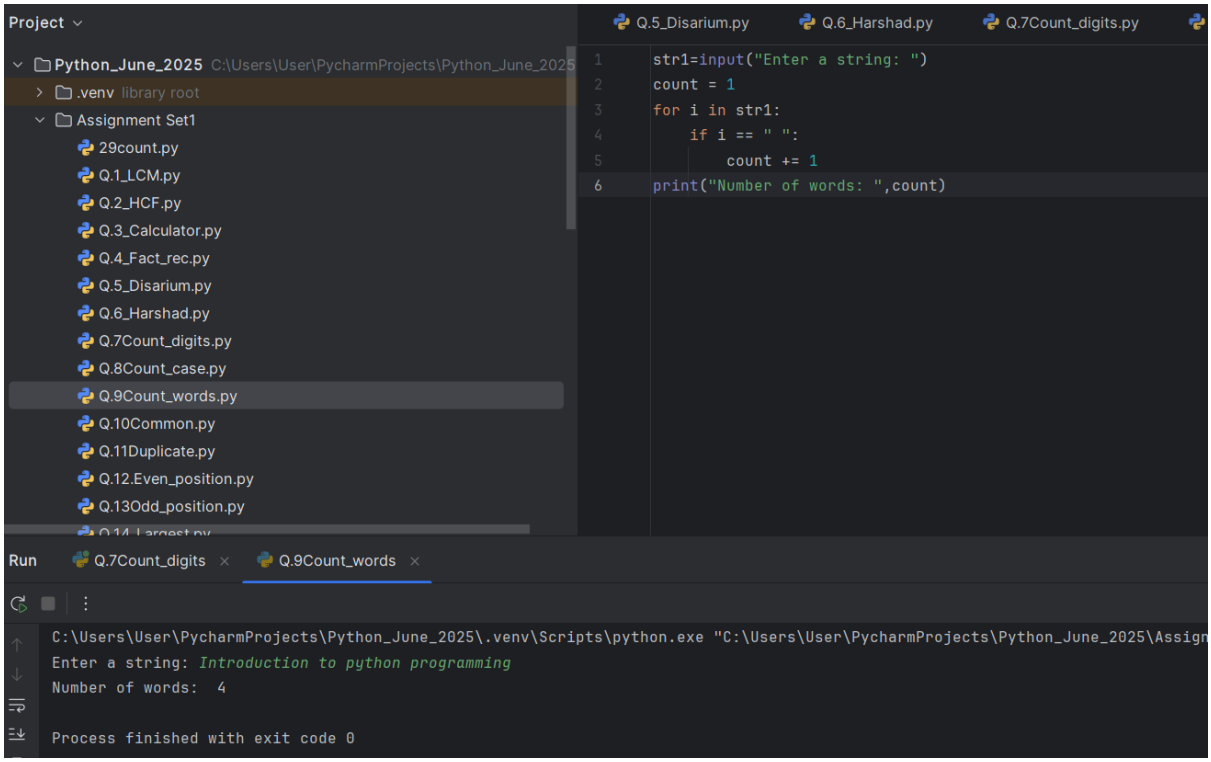

7. Python program to check the number of digits present in a integer

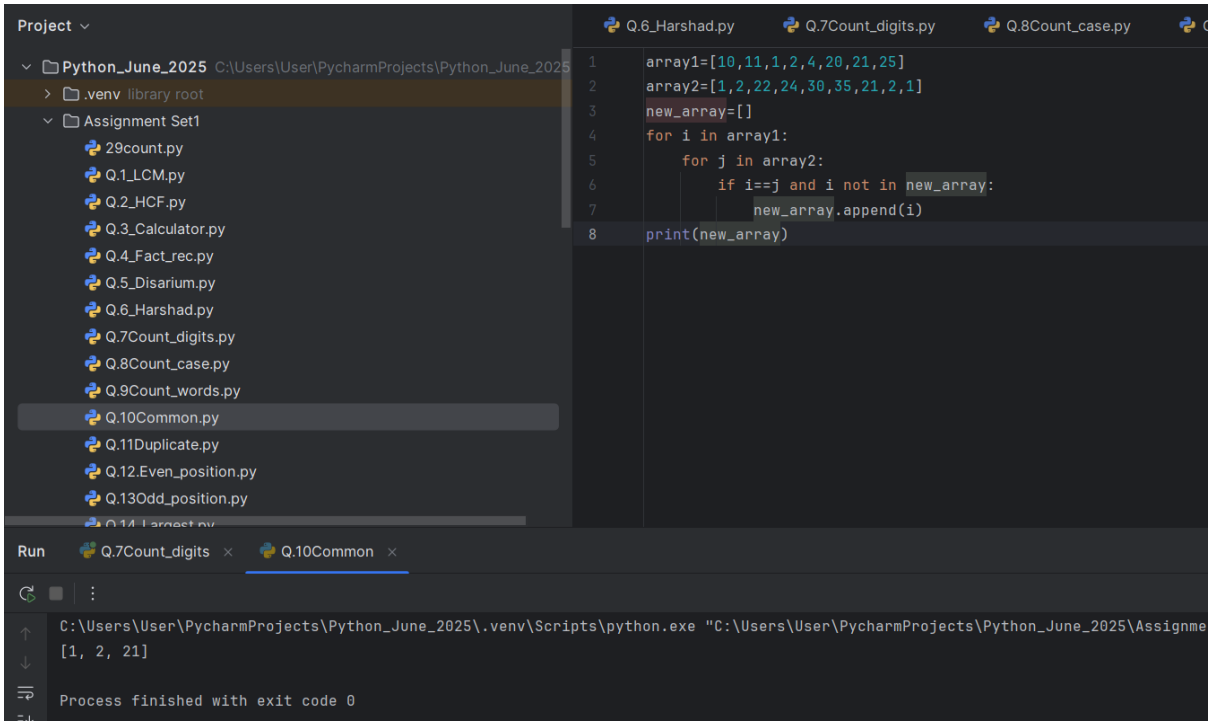

8. How to count the number of upper and lowercase letters in a string

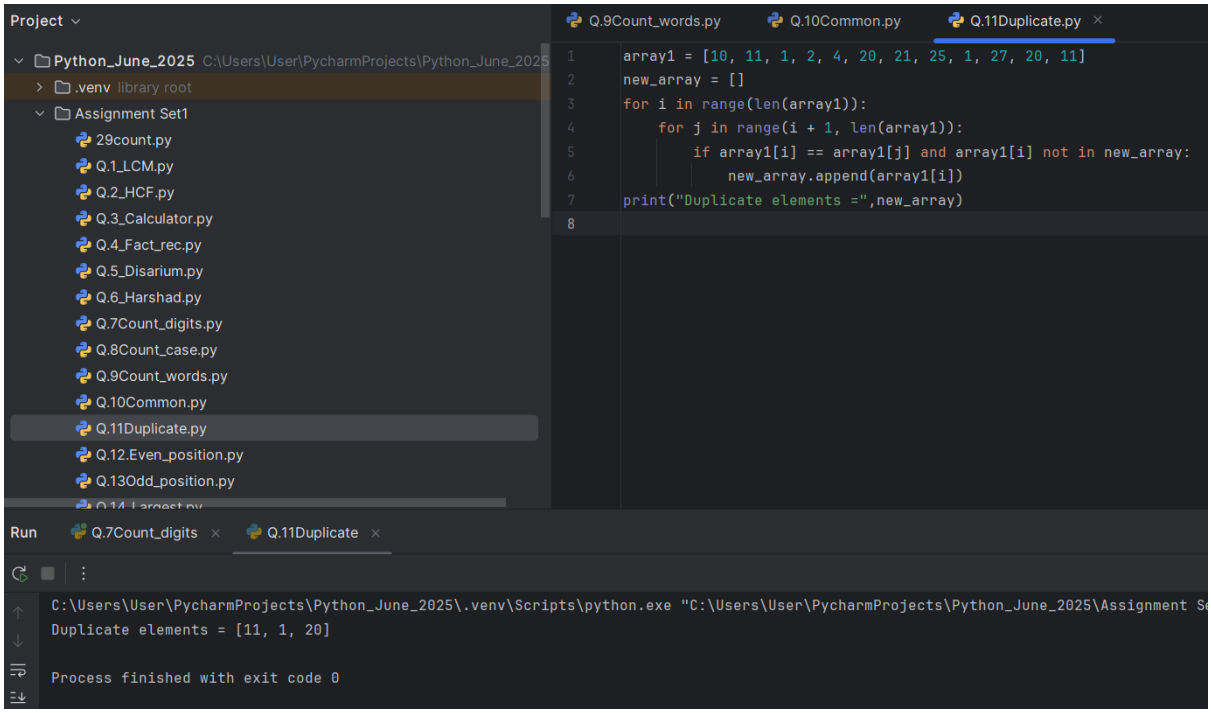

9. Write a program to count words in string

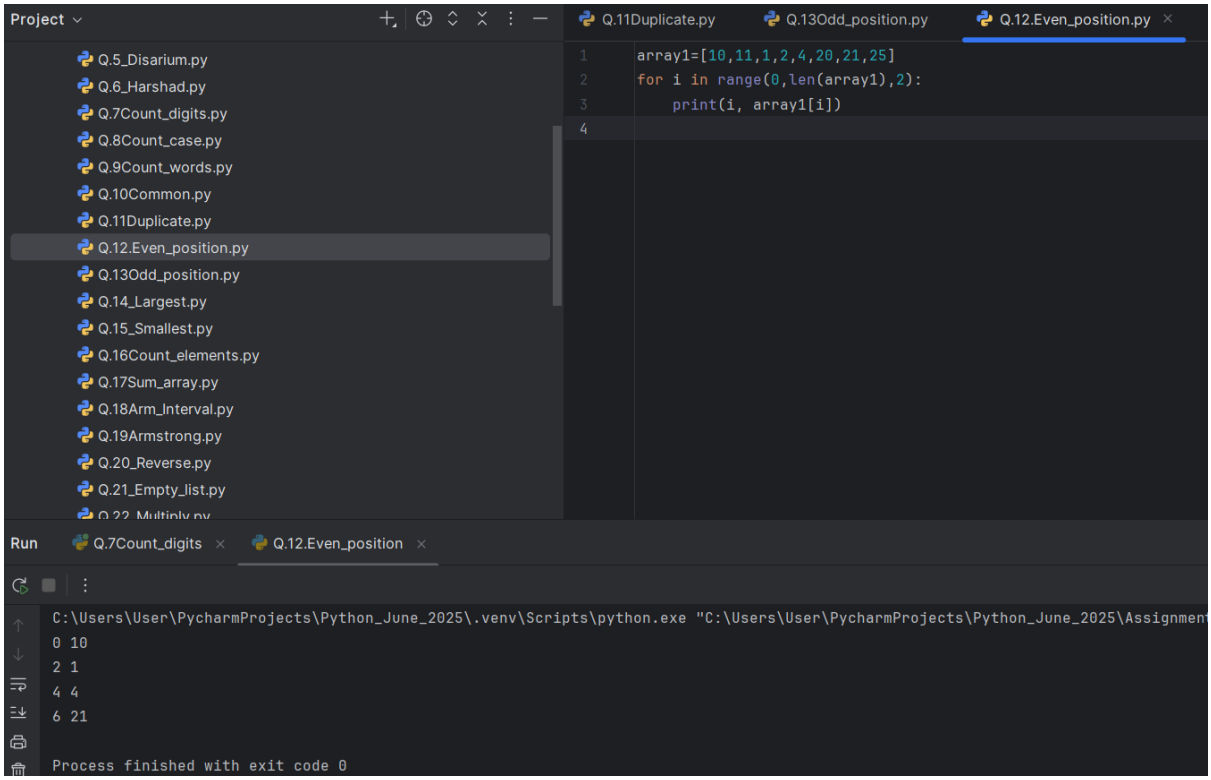

10. Write the program to find the lists consist of at least one common element.

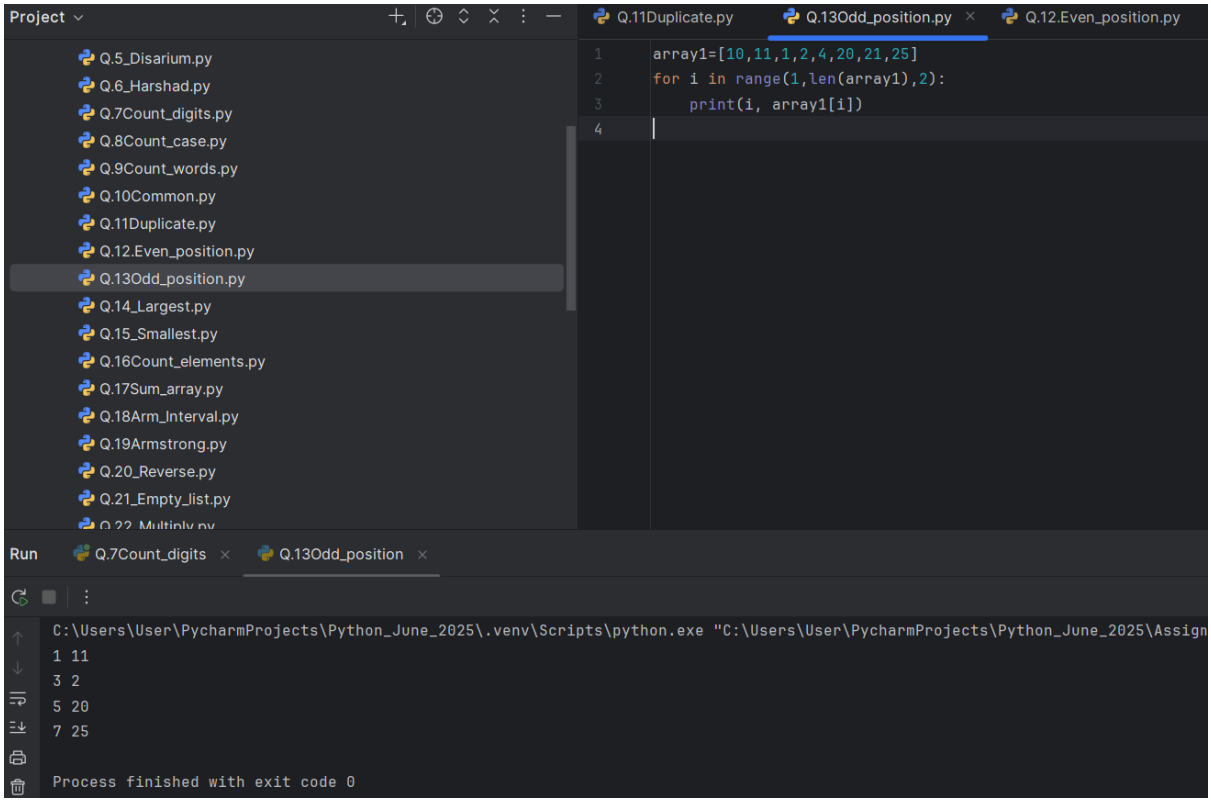

11. Python program to print the duplicate elements of an array

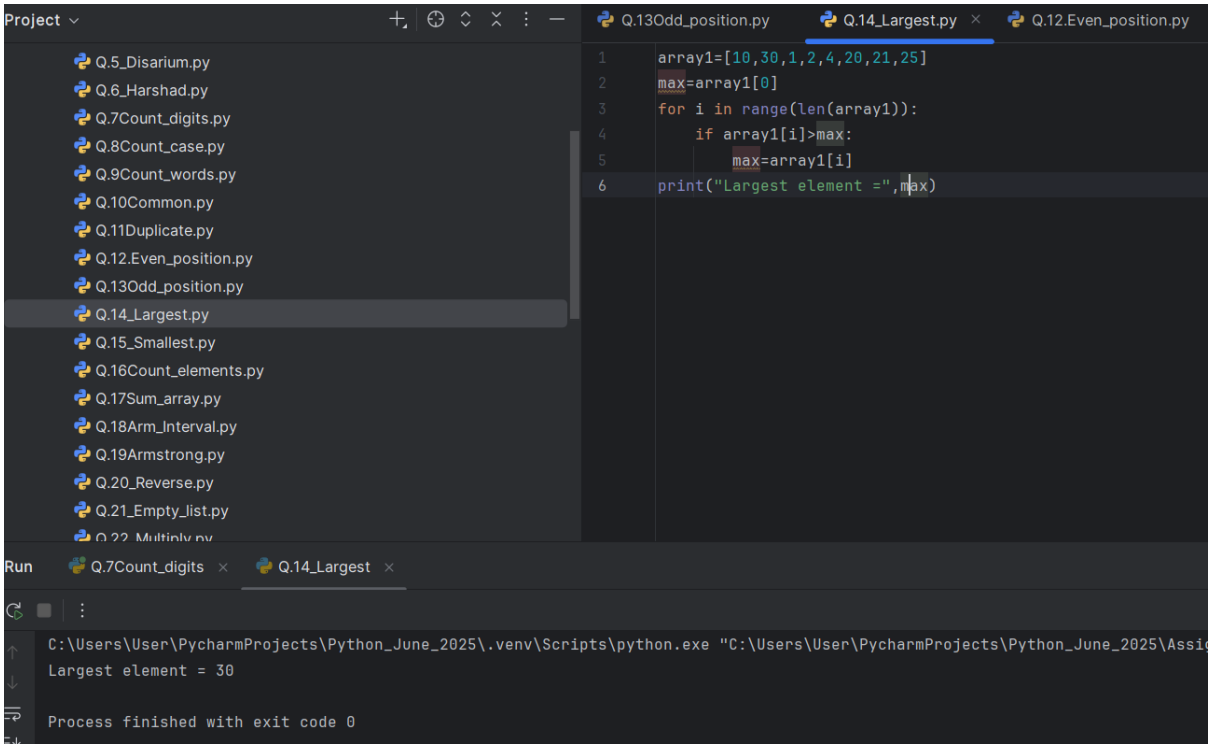

12. Python program to print the elements of an array present on even position

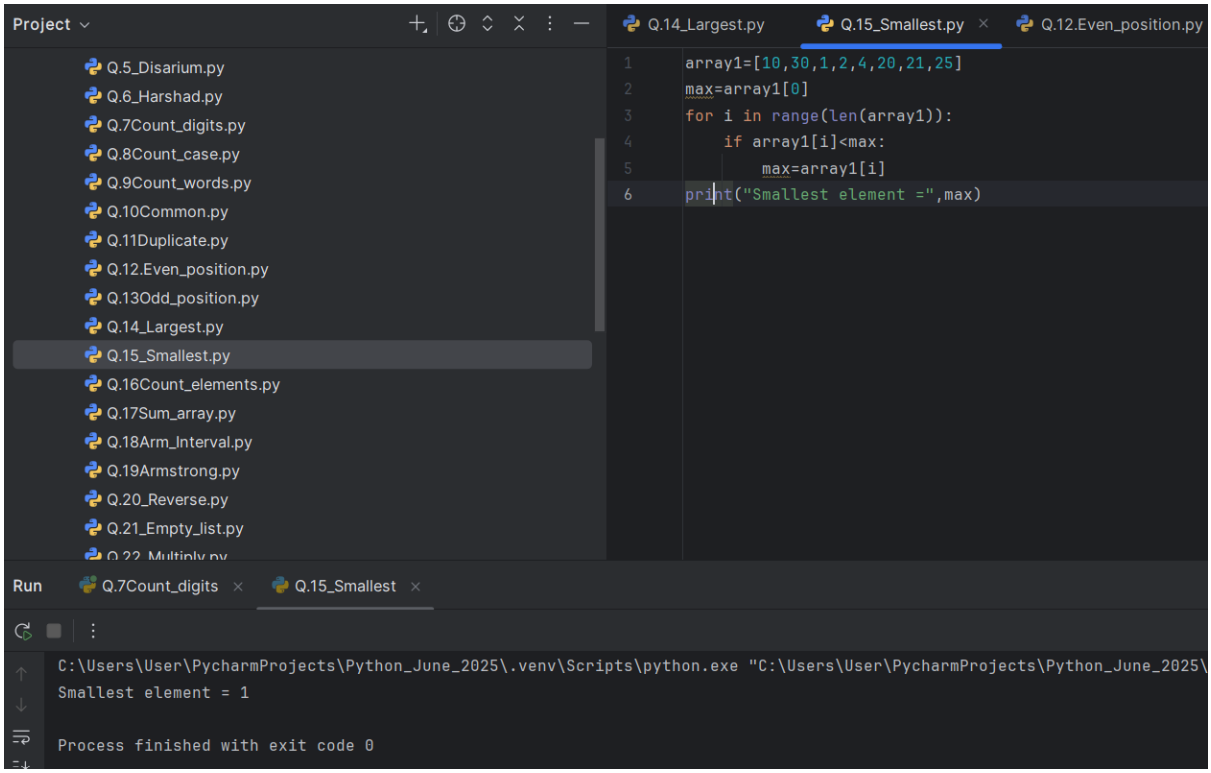

13. Python program to print the elements of an array present on odd position

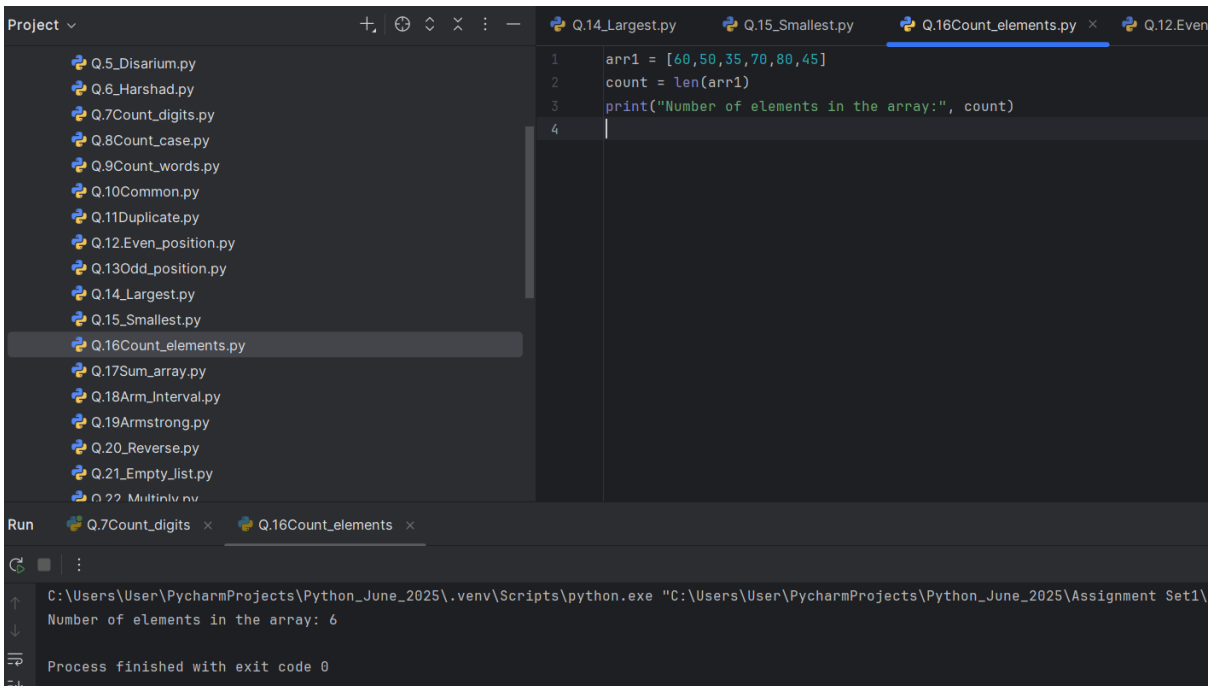

14. Python program to print the largest element in an array

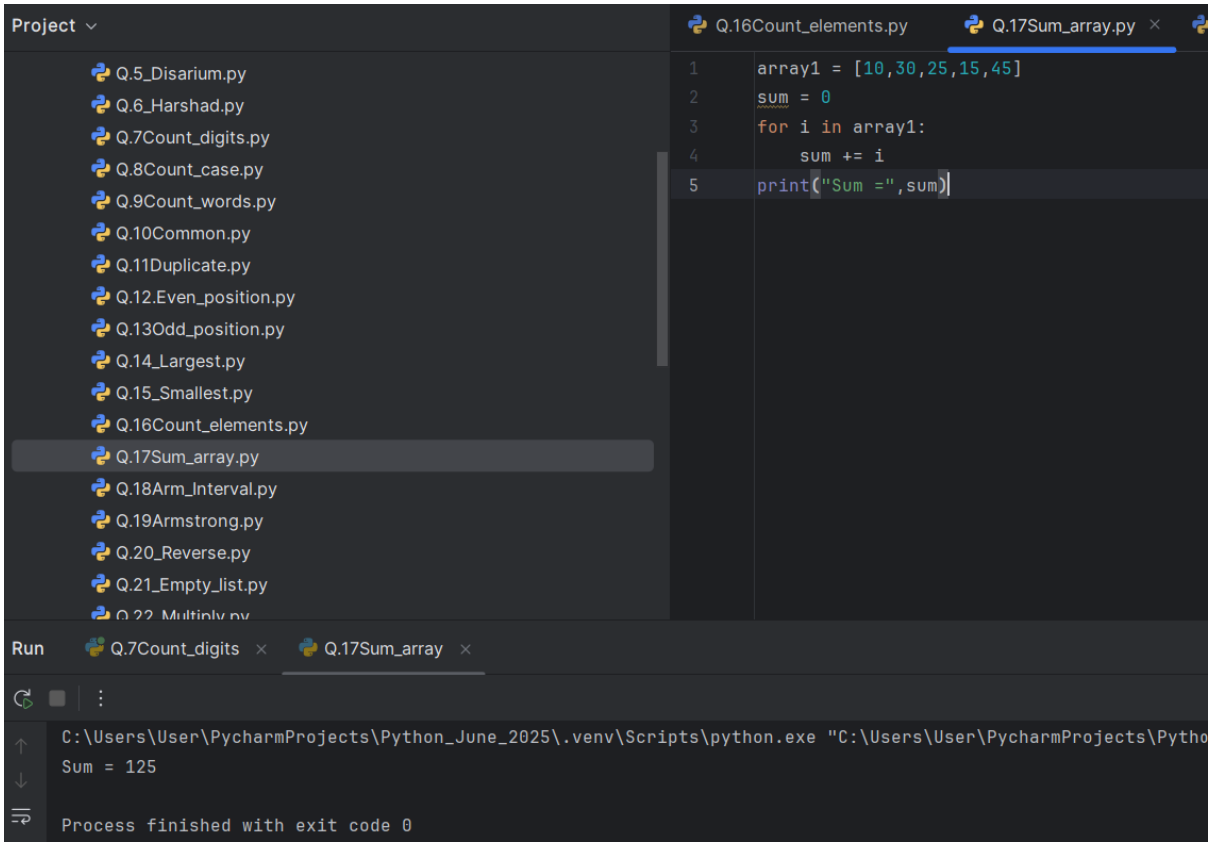

15. Python program to print the smallest element in an array

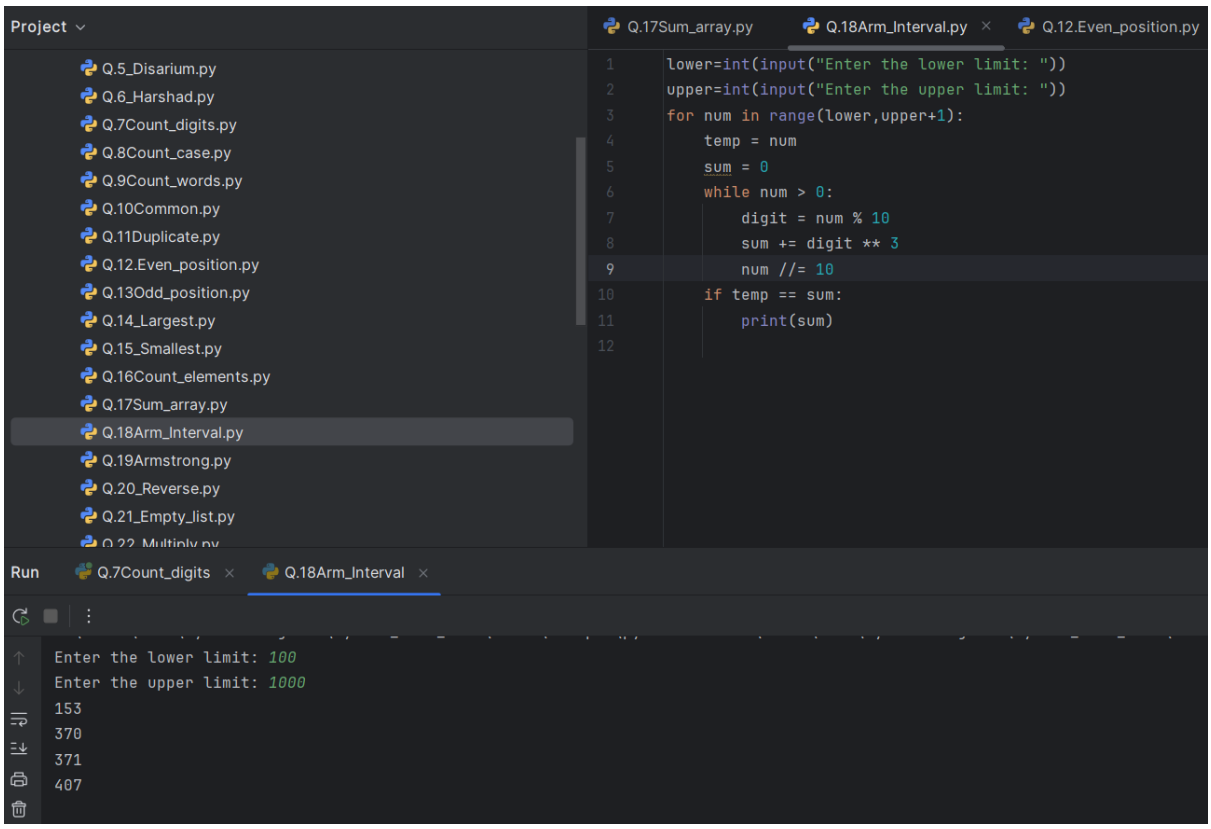

16. Python program to print the number of elements present in an array

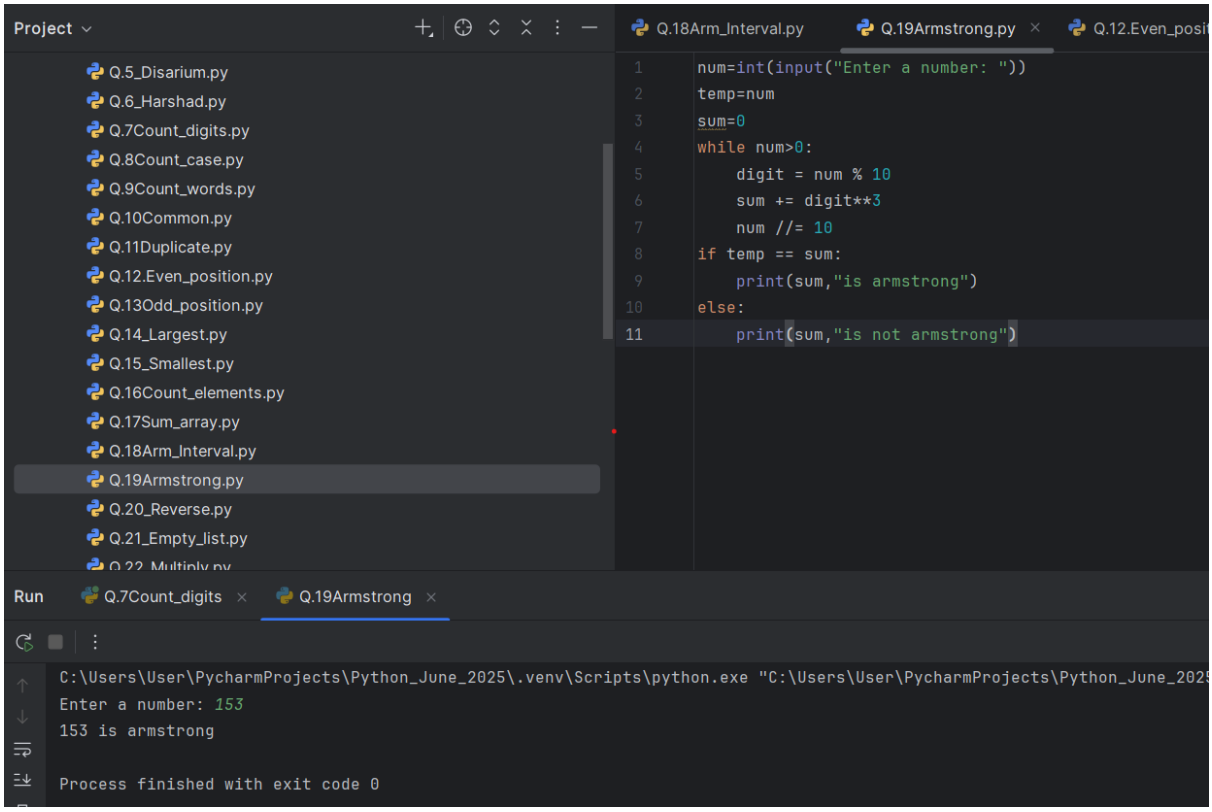

17. Python program to print the sum of all elements in an array

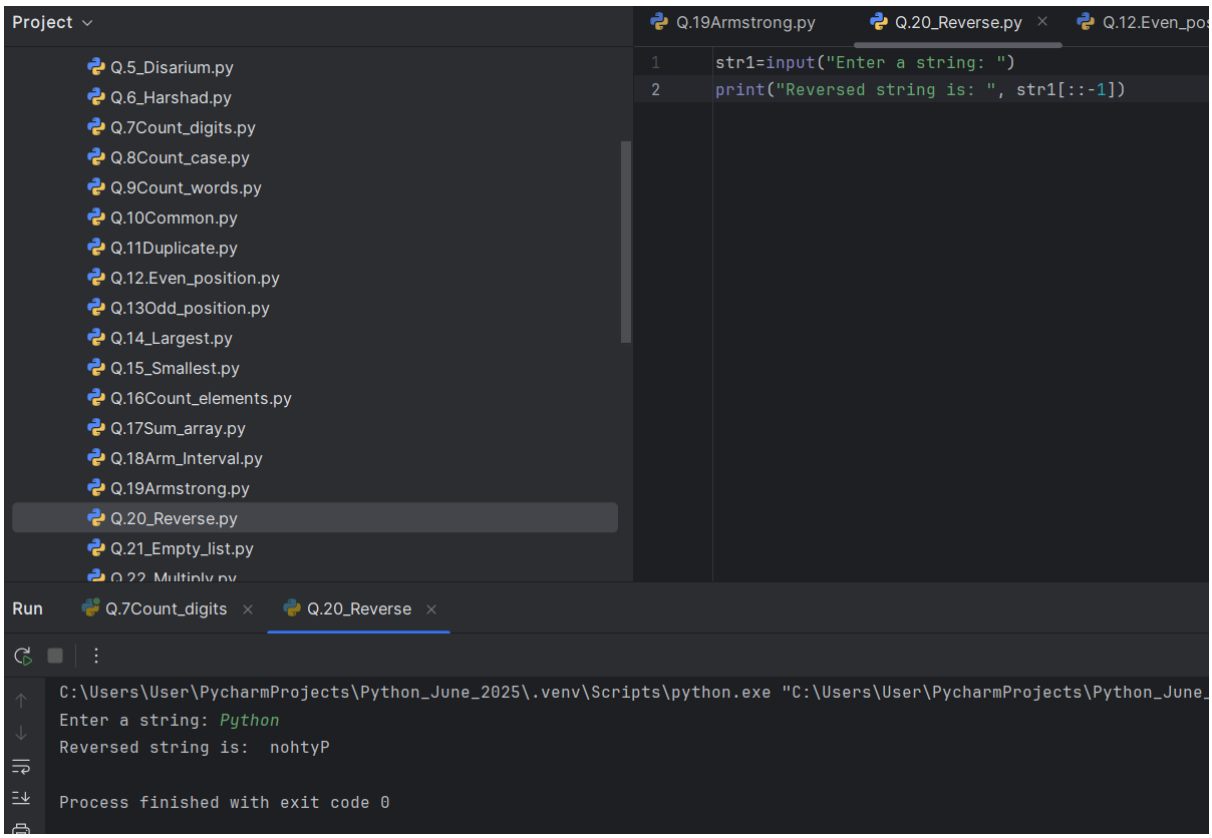

18. Python Program to Find Armstrong Number in an Interval

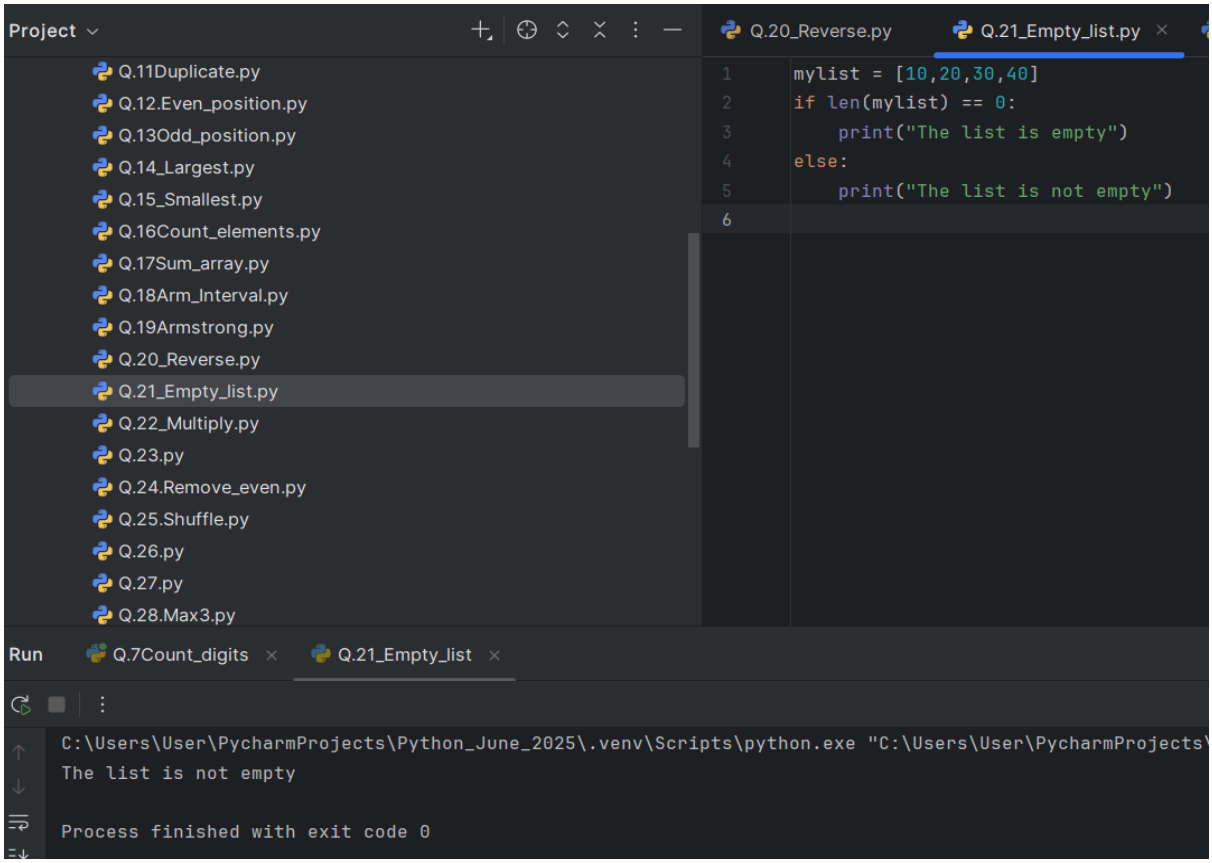

19. Program to Check Armstrong Numbers in Python

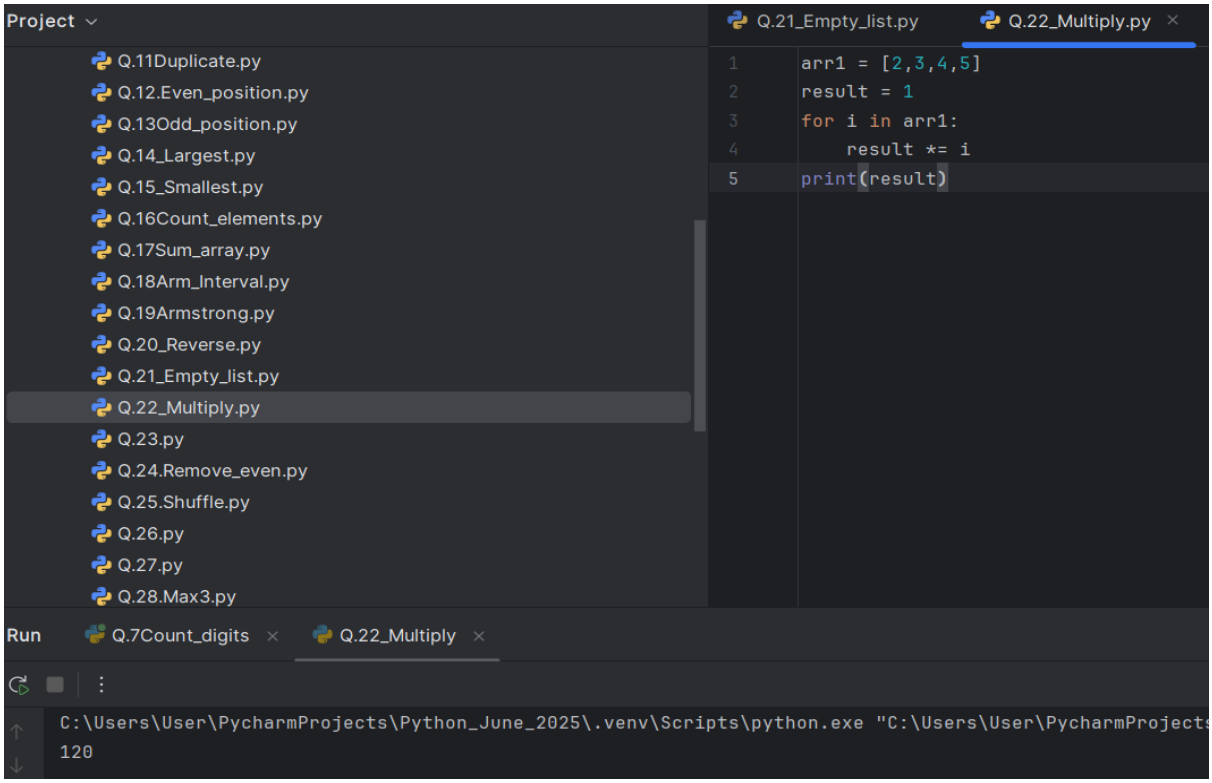

20. Write a Python program to reverse a string.

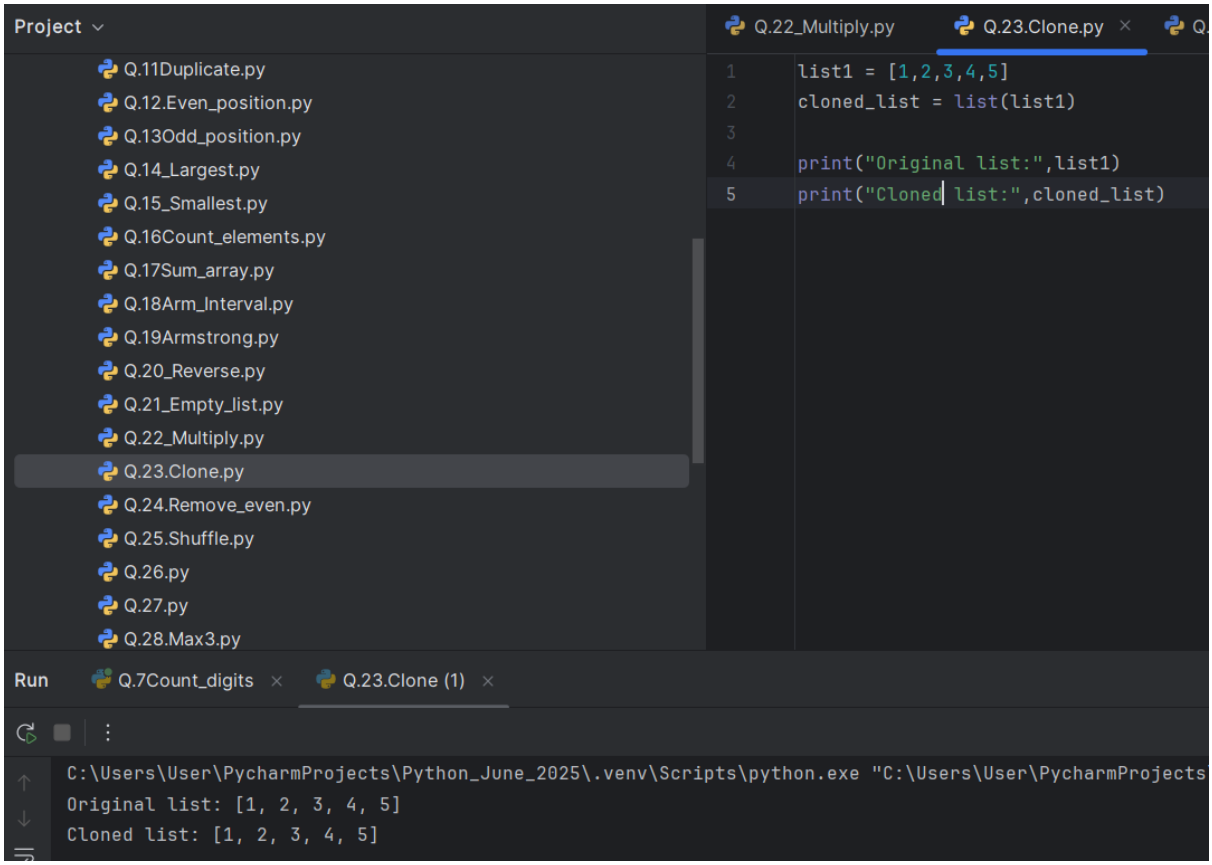

21. Write a Python program to check if a list is empty or not.

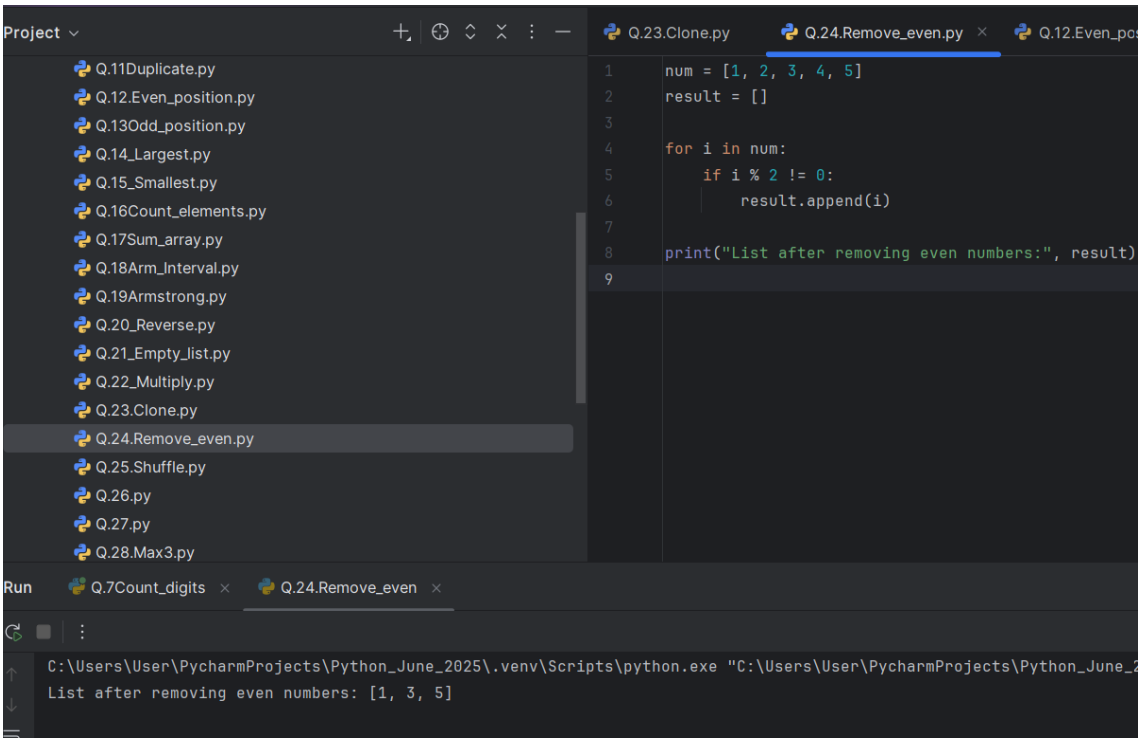

22. Write a Python program to multiply all the items in a list.

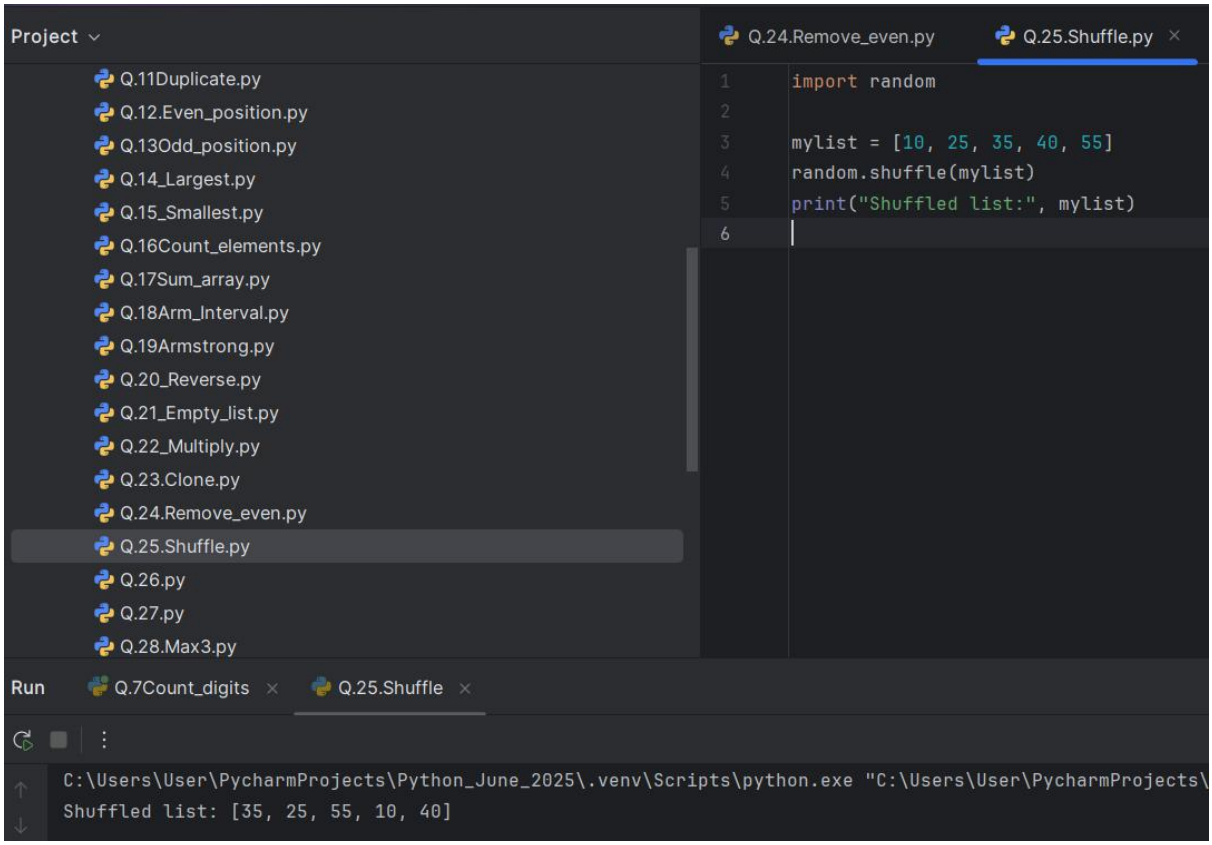

23. Write a Python program to clone or copy a list.

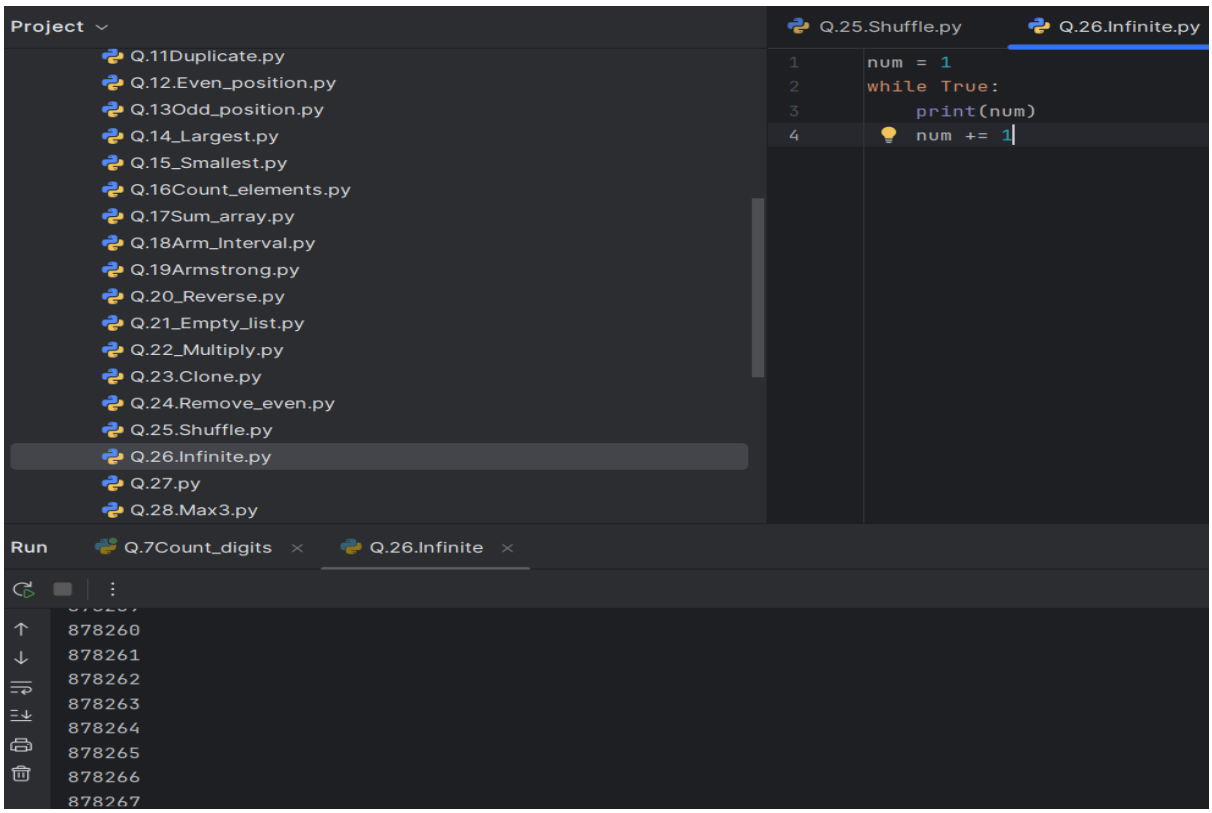

24. Write a Python program to print the numbers of a specified list after removing even numbers from it.

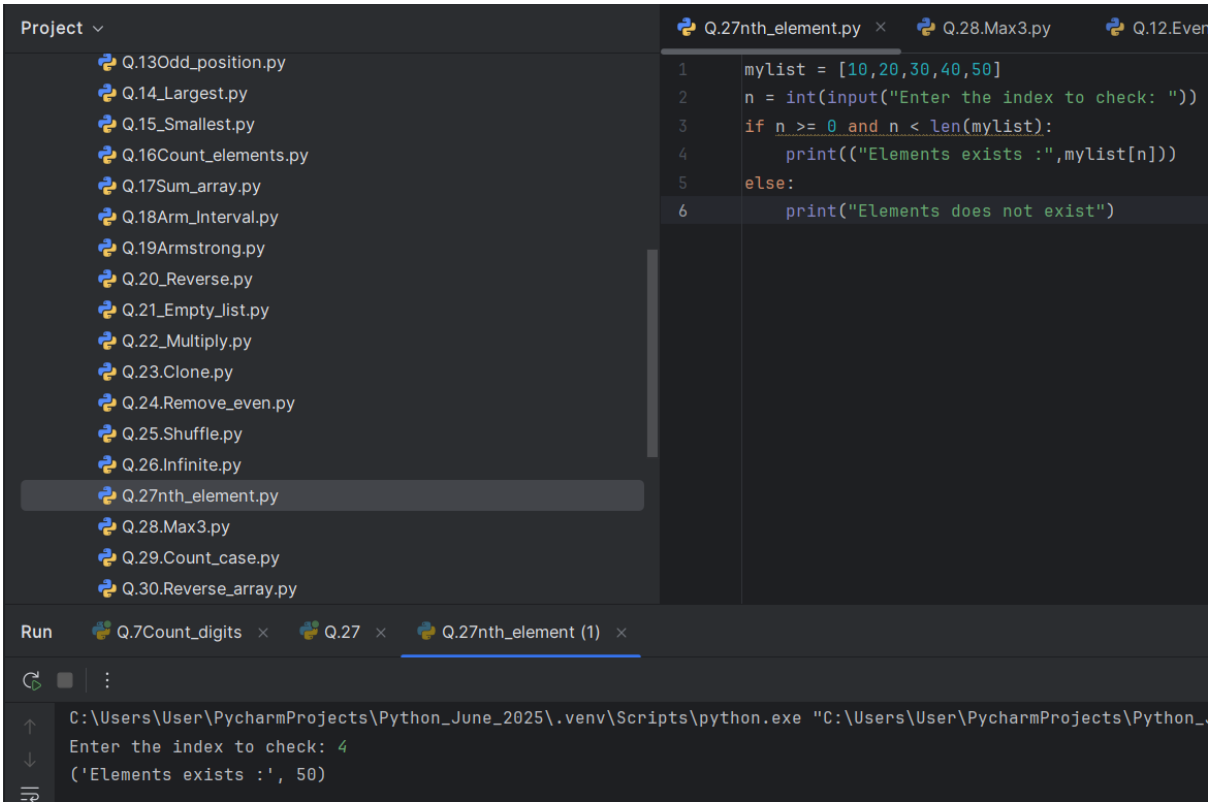

25. Write a Python program to shuffle and print a specified list.

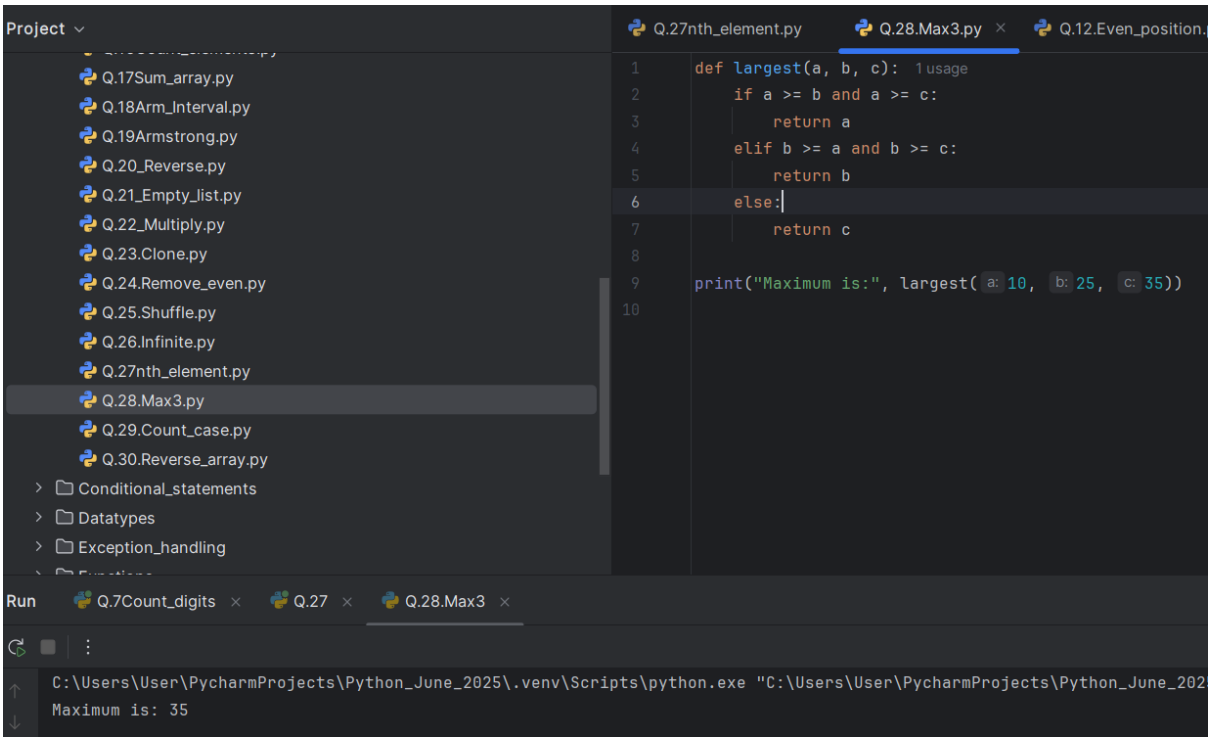

26. Write a Python program to print infinite number of elements.

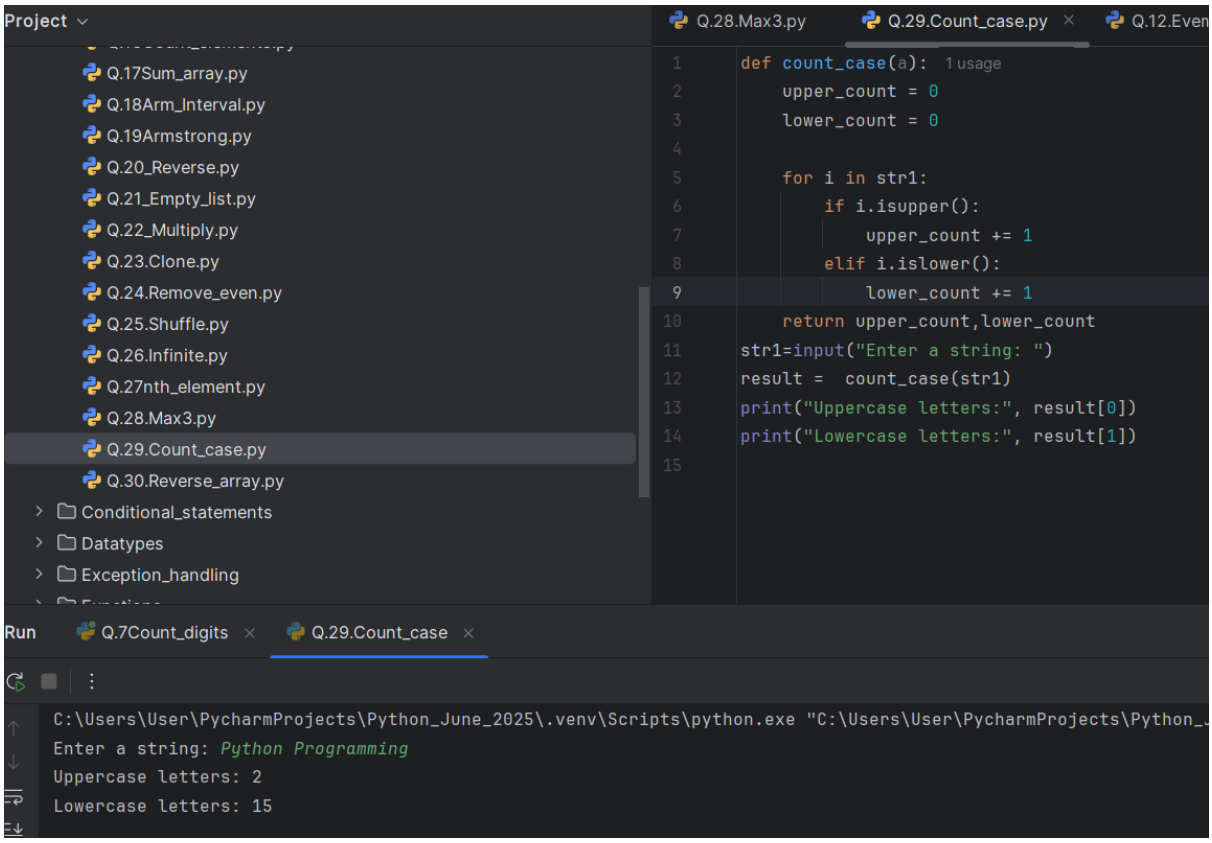

27. Write a Python program to check whether the n-th element exists in a given list.

28. Write a Python function to find the maximum of three numbers.

29. Write a Python function that accepts a string and counts the number of upper- and lower-case letters.

30. Write a Python program to reverse the order of the items in the array.
